ADTEC Automatic UV Exposure System for Patterning (ADEX3000P)

Price per Unit (piece): [Call for Pricing](#)

ADTEC Fully Automatic UV Exposure System (ADEX3000P)

ADTEC ADEX3000P High Precision Exposure system for both **INNER** and **OUTER** layer imaging.

Using ADTEC's Patented Air Bag contact system, We solve all problems link to Vacuum contact process. Also available vacuum contact process which ADTEC further improve to minimize vacuum contact problems.

ADTEC concentrated on dust particples problem and transportation know how ensure stable environment for today higher quality board.

Call us to find out more about ADTEC state of art alignment technology which is used for manufacturing semiconductor inspection equipment.. WE use such high technology on PCB manufacturing!! We use shape search image processing techniques resolution in superior resolution of even chipped or damaged marks. So No more headaches and stress ...with ADTEC imaging system

FEATURES

Patented Air-Bag contact method or Vacuum contact method

Both applicable to Glass Mask and Film Mask

Applicable to Thin Boards

Able to handle ultra thin board from 0.05mm to 3.2 mm (or more if required)

Simplified setting-up process

An equipped auto setting-up function has simplified the setting up-process(such as the mask and board mark registration), adjustment and memory of the camera and board carry-in positions.

Cleanliness/ ONE piece table structure/ able to handle even thin board; HEPA filters, ionizers, and SUS have been used to controls NG occurrence caused by floating dusts.

ONE piece table structure - With a seamless one-piece table, we can reduce dust particulates generation and enable ultra thin board transportation..

Flexible strips substrates can also be exposed better based on one piece table concept.

A Mask cleaner and a Platen cleaner available as option to further clean boards!!!

Easy and Quick setup process

A automatic setting up function simplified by ADTEC make it simple and easy for setup.

Special shape search image process

Internet connectivity from ADTEC machine to our Japan Service centre ...meaning 24 hours , we are by your side.
